SUBJECT INDEX

Abattoir
Occurrence of *Erysipelothrix* spp. in chickens, 907
Poultry bacterial populations, 700
Acceptability
C. Botulinum on sliced potatoes with and without sulfitte in a modified atmosphere, 126
Acetic acid
ATR of *E. coli* exposed to acetic acid, 542
Microbial profile of ground beef, 1109
Microbial profile of ground beef, 1615
Postprocess beef carcass contamination, 300
Acid inhibition
Propionibacteria in acid and low pH, 211
Acid resistance
Helicobacter pylori survival and growth, 929
Acid shock response
Cross protection to acid and osmolarity, 158
Acid stress
D values of acid-stressed *E. coli*, 1184
Acid tolerance response
ATR of *E. coli* exposed to acetic acid, 542
Cross protection to acid and osmolarity, 158
Activated carbons
Affinity of activated carbons for ochratoxin A and deoxynivalenol, 469
Adherence on stainless steel
E. faecium adherence on stainless steel, 1454
Adhesion
Adhesion of *A. hydrophila* to water distribution pipes, 1321
Adulteration
Quantitative evaluation of pork adulteration, 1686
Aerobic plate count
Evaluation of SimPlate™ total plate count, 14
Aeromonas hydrophila
Adhesion of *A. hydrophila* to water distribution pipes, 1321
Inhbitory effects of plant extracts on pathogens, 307
Survival of *aeromonas hydrophila* in tomatoes, 414
Aeromonas
Growth of pathogens at 4°C on fillets of aquacultured fish, 313
Aflatoxin
Alteration of bacterial ability to remove aflatoxin, 466
Corn proteins and resistance to *aspergillus flavus*, 98
Aflatoxin B_1
Metal ions in aflatoxin B_1 degradation, 1666
Aflatoxin M_1
Occurrence of aflatoxin M_1 in diary products in Italy, 738
Aflatoxins
Aflatoxins, fumonisin B1, and zearalenone in foods, 1670
Aged
Foodborne illness in the elderly, 1229
Agglutination
Agglutination behavior of milk starter cultures, 855
Airline food
Microbiology of airline food, 1052
Albacore
Biogenic amines in frozen albacore, 608
Albendazole
Albendazole residues in milk and cheese, 1484
Albendazole metabolites
Albendazole residues in milk and cheese, 1484
Alicyclobacillus acidoterrestris
Heat resistance of *A. acidoterrestris* spores, 41
Alkaline phosphatase
Enzyme marker for pasturization end point in milk, 1057
Alternaria
Storage effects on barley deoxynivalenol and mold viability, 103
Amines
Biogenic amines in frozen albacore, 608
Anaphylaxis
Anaphylaxis from milk-contaminated sorbet, 1522
Animal feeds
Molecular assay for bovine mtDNA detection in feedstuffs, 513
Animal transport
Trailer washing for *salmonella* reduction, 31
Antibacterial action
Inactivation of *E. coli* by vinegar, 953
Antibacterial compound
Inactivation of foodborne bacteria by pressure and pediocin AcH, 425
Antibacterial effect
Antibacterial effect of *N*-sulfonated and *N*-sulfobenzoyl chitosan, 1124
Antibiograms
Staphylococcus aureus strains isolated from bovine milk, 629
Antibiotic residue
Antibiotic tests for goats, 344
Antibiotic resistance
Antibiotic resistance to *E. coli*, 1511
Antibiotic resistant
Susceptibility of pathogens to acid anionic sanitizers, 1390
Antibiotic susceptibility
Antibiotic susceptibility of *Lactobacillus* species, 1636
Antimicrobial
Antimicrobial properties of lysozyme transgenic milk, 52
Antimicrobial residues
Antimicrobial residues in milk and meat—a review, 742
Enzyme immunoassay validation for drug residues in tissue, 1018
Antimicrobial spray
Antimicrobial spray of chicken carcasses, 829
Antioxidants
Antioxidant migration from PP into food simulants, 1000
Antiseptic
Plasmids in *Listeria* spp., 1459
APC
Bacterial flora of swine head meat, 249
API *Listeria*
L. monocytogenes from unpasteurized apple juice, 1199
Apiotrichum curvatum
Apiotrichum curvatum oil production in tomato juice, 1515
Apple
Microwave inactivation of microorganisms, 582
Sanitizing produce, 1305
Apple cider
Survival of *E. coli* O157:H7 in apple cider, 490
Thermotolerance of *E. coli* O157:H7 in apple beverages, 390
Apple juice
Thermotolerance of *E. coli* O157:H7 in apple beverages, 390

Apples
E. coli O157:H7 in apples, 1372
Growth of mold on apples under MA, 1661
Aquaculture system
Microbial quality of aquacultured finfish, 205
Arcobacter
Arcobacter in mechanically separated turkey meat, 1623
Aroma
Authenticity testing of saffron aroma, 1525
Arrhenius model
Arrhenius and *z*-value models, 910
Arsenic
Arsenic speciation in manufactured seafood products, 1240
Artificial digestion
Inspection methods for trichinellosis, 339
Ascorbic acid
Degradation asparagus vitamin C during thermal processing, 1518
Aspergillus flavus
Antifungal activity of herbs and spices, 123
Aspergillus flavus control in maize with essential oils, 616
Aspergillus niger
Antifungal activity of herbs and spices, 123
ATP
Comparison of ATP hygiene-monitoring systems, 499
ATP bioluminescence
Effect of sanitizers on ATP bioluminescence, 1013
Attachment
Attachment kinetics of *Listeria monocytogenes*, 1286
Attachment of *Listeria* monocytogenes, 1293
E. coli O157:H7 and meat grinders, 817
S. typhimurium attachment to mucus, 265
Bacillus cereus
B. cereus in infant cereal, 1629
Psychrotrophic *Bacillus cereus*, 563
Bacillus
Identification of *B. cereus* by FTIR, 921
Bacteria
Microbial population and ethanol content of bagged salad, 358
Bacterial attachment
Sanitizers against *E. faecium* on stainless steel, 833
Bacterial counts
Changes in pressurized milk, 735
Bacterial cross-contamination
Cross-contamination during liquid nitrogen freezing, 1103
Bacterial enumeration
Performance of the petrifilm™ HEC test, 402
Bacterial killing
Bacterial killing by combined treatments, 839
Bacterial populations
Poultry bacterial populations, 700
Bacteriocin
Bacteriocin-mediated inhibition of *L. monocytogenes*, 186
Bifidocin B from *bifidobacterium bifidum* NCFB 1454, 47
Bacteriocins
Interactions between bacteriocins, 1210
Baking
Stability of fumonisins under heating, 1030
Barley
Storage effects on barley deoxynivalenol and mold viability, 103
Bee pollen
Gamma irradiation and ozone treatment on bee pollen, 217
Beef
Beef decontamination by hot water, 19
Chemical dehairing of bovine skin, 623
Decontaminating beef for *E. coli* O157:H7, 547
E. coli in cattle feces, 531
Inhbitory effects of plant extracts on pathogens, 307
Microbiological quality of meat in Australia, 437
Pathogen reduction by combined treatments, 823
Performance of the petrifilm™ HEC test, 402
Purge sampling method for beef, 162
Steam pasteurization of beef carcasses, 571
Beef carcass
Verification of beef carcass cooling, 1347
Beef carcass wash water
Detection of *E. coli* O157:H7 in carcass wash water, 934
Beef carcass washes
Microbial profile of ground beef, 1109
Microbial profile of ground beef, 1615
Postprocess beef carcass contamination, 300
Beer
Microwave inactivation of microorganisms, 582
Beers
Cobalt and managanese in beers, 129
Bifidobacterium bifidum
Bifidocin B from *bifidobacterium bifidum* NCFB 1454, 47
Bifidobacterium
Bifidobacterium characterization, 865
Bifidocin B
Bifidocin B from *bifidobacterium bifidum* NCFB 1454, 47
Binding
Affinity of activated carbons for ochratoxin A and deoxynivalenol, 469
Bioaccumulation
Detection of NV in shellfish by RT-PCR, 1674
Biodegradable packaging film
Antimicrobial packaging films, 1330
Biofilm
Decontamination of *L. monocytogenes* biofilms, 731
Rapid assessment of sanitizer efficacy against biofilms, 1043
Biofilms
E. coli O157:H7 in inoculated bottled water, 948
Biological agents
Risk assessment of foodborne disease agents, 1071
Biological control
Growth of mold on apples under MA, 1661
Bioluminescence
Rapid assessment of sanitizer efficacy against biofilms, 1043
Rapid detection of vaiable bacteria, 1312
Use of bioluminescent *Salmonella* to monitor survival and viability, 1439
Biopreservative
Interactions between bacteriocins, 1210
Bivalve shellfish
Listeria and *Salmonella* in mussels, 1137
Blood ATP
Effect of sanitizers on ATP bioluminescence, 1013
Botrytis cinerea
Growth of mold on apples under MA, 1661

Botswana
Aflatoxins, fumonisin B1, and zearalenone in foods, 1670
Bottled water
Coliforms in bottled water, 334
E. coli O157:H7 in inoculated bottled water, 948
Bovine mitochondrial DNA
Molecular assay for bovine mtDNA detection in feedstuffs, 513
Bovine spongiform encephalopathy
Molecular assay for bovine mtDNA detection in feedstuffs, 513
Brevibacterium linens
Histamine and tyramine degradation in cheese, 874
Broad spectrum
Susceptibility of pathogens to acid anionic sanitizers, 1390
Broiler
Rapid method for enumeration of *E. coli*, 1375
Broiler chickens
Dosage titration of a characterized competitive exclusion culture, 796
Browning prevention
Shelf life of sliced raw potatoes, 1363
C. perfringens
Heat shock response of *C. perfringens*, 1143
Cabbage
Microbiology of packaged produce, 1148
Callipyge lambs
Cross-contamination during liquid nitrogen freezing, 1103
Campylobacter
Survival of *C. jejuni* associated with wood, 26
Campylobacter spp. in porcine liver, 409
Campylobacter jejuni
Survival and growth of *Campylobacter jejuni* on chicken skin, 1609
Canning
Stability of fumonisins under heating, 1030
Capacitance
Prediction of fresh fish shelf life, 844
Capillary electrophoresis
Capillary electrophoresis of furosine, 1400
Carbon dioxide
Salt balance in CO_2-treated milks, 66
Carcass
Microbiological quality of meat in Australia, 437
Motile aeromonads from chicken, 113
Performance of the petrifilm® HEC test, 402
Carcass contamination
Foodborne pathogens on pork and beef carcasses, 535
Carcass dressing
Sheep carcass dressing process, 329
Carcass microbial contamination
E. coli isolation from carcasses, 1269
Casein
Selective hydrolysis of milk proteins, 1007
Catalase
Rapid catalase activity method, 253
Virulence factors of *L. monocytogenes*, 899
Catfish
Organic acid spray wash of catfish, 495
Organic acids effect on *L. monocytogenes* on catfish, 1470
Cattle
Antibiotic resistance to *E. coli*, 1511
E. coli in cattle feces, 531
E. coli O157 risk factors in cattle, 802
Caviar
Microbial evaluation of Alaska salmon caviar, 626
CD-ELISA
Fumonisins in corn-based foods, 704
Cecal colonization
Reduction of *Salmonella* colonization, 176
Cell wall
Bacterial cell wall, 557
Degradation of hemicellulosic polysaccharides, 87
Degradation of pectic polysaccharides, 78
Certification
Certification of microbiological methods, 1579
Channel catfish
Growth of pathogens at 4°C on fillets of aquacultured fish, 313
Characterization
Extracellular λ-actamases from *Streptococcus thermophilus*, 896
Cheese
Albendazole residues in milk and cheese, 1484
Bacteriocin-mediated inhibition of *L. monocytogenes*, 186
Cheese-associated disease outbreaks, 1405
Interactions between cheese-related fungi, 1023
Microbiology of Serra da Estrela cheese, 601
Occurrence of *Listeria* supp. in Brazilian cheese, 354
Cheese fermentation
Histamine and tyramine degradation in cheese, 874
Chemical sanitizers
Effect of sanitizers on ATP bioluminescence, 1013
Chemiclearance
Vitamins in irradiated exotic meats, 1681
Chemometrics
Indicators of origins of spanish salts, 891
Chicken
Occurrence of *Erysipelothrix* spp. in chickens, 907
Quantitative microbiological risk assessment, 1446
Rapid method for enumeration of *E. coli*, 1375
Chicken carcass
Antimicrobial spray of chicken carcasses, 829
Chicken egg
Bacterial penetration after egg washing, 276
Chicken legs
Formation of heterocyclic amines in cooked chicken legs, 712
Chicken meat
Occurrence of *Erysipelothrix* in chicken meat, 1207
Chicken skin
Chemical spraying of chicken skin, 272
Survival and growth of *Campylobacter jejuni* on chicken skin, 1609
Chickens
Detecting *salmonella enteritidis* in eggs, 107
Reduction of *Salmonella* colonization, 176
Chilling
Chilling and trimming reduce microorganisms, 487
Chlorine
Survival of *aeromonas hydrophila* in tomatoes, 414
Chlorine dioxide
Chlorine dioxide bactericidal activity, 668

Chlorpyrifos
Determination of diazinon and chlorpyrifos, 708
Cider
E. coli O157:H7 in apples, 1372
Microwave inactivation of microorganisms, 582
Citrus
Citrus surface microflora reduced in packinghouse, 903
Clams
PCR detection of viruses in clam extracts, 458
Cleaning and disinfection procedures
Evaluation of baby bottle disinfection procedures, 196
Clonal diarrheagenic *Escherichia coli*
Colicinogeny among clonal diarrheagenic *E. coli*, 1431
Clostridium botulinum
Pathogens in smoked fish and shellfish, 318
C. Botulinum on sliced potatoes with and without sulfitte in a modified atmosphere, 126
Clostridium botulinum and fresh filled pasta, 988
Microbiology of packaged produce, 1148
Prediction of time to *C. botulinum* toxin for use with TTI, 1154
Toxin production by *Clostridium botulinum* in map vegetables, 324
Clostridium perfringens
Clostridium perfringens enterotoxin gene prevalence, 240
Detection of *C. perfringens* in spices, 201
CM medium
Rapid method for enumeration of *E. coli*, 1375
Cobalt
Cobalt and managanese in beers, 129
Codex Alimentarius
Effect on international trade of tolerance limits, 1571
Colicin plasmids
Colicinogeny among clonal diarrheagenic *E. coli*, 1431
Colicinogeny
Colicinogeny among clonal diarrheagenic *E. coli*, 1431
Coliform
Evaluation of simplate total coliforms and *E. coli*, 444
Coliform bacteria
Citrus surface microflora reduced in packinghouse, 903
Coliform media
Coliforms in bottled water, 334
Coliforms
Bacterial flora of swine head meat, 249
Coliforms in bottled water, 334
Salmonellosis associated with orange juice, 280
College students
Food safety attitudes, practices, and knowledge, 1175
Color
Solubility and color of dried soymilk, 231
Combined treatment
Use of heat and spices in preservation of mango juice, 725
Come-up time
High hydrostatic pressure come-up time, 1657
Commercial egg-washing chemicals
Bacterial penetration after egg washing, 276
Comparison
Comparison of ATP hygiene-monitoring systems, 499
Competitive exclusion
Dosage titration of a characterized competitive exclusion culture, 796
Reduction of *Salmonella* colonization, 176
Confirmation
Confirmation of *Salmonella* by PCR, 1381
Contaminants
Effect on international trade of tolerance limits, 1571
Cooked
Irradiation of *L. monocytogenes* on raw or cooked turkey, 979
Cooked meat
Monoclonal antibodies to cooked meats, 476
Cooking temperature
Rapid catalase activity method, 253
Cooling
Verification of beef carcass cooling, 1347
Corn
Detection of toxigenic fungi in corn, 221
FB_1 fed to rainbow trout, 1034
Fumonisins in corn-based foods, 704
Stability of fumonisins under heating, 1030
Corn-based foods
Fumonisins in corn-based foods, 704
Cottage cheese
Escherichia coli O157:H7 in dairy foods, 1098
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
Cow's milk
Salt balance in CO_2-treated milks, 66
Cow's milk protein allergenicity
Selective hydrolysis of milk proteins, 1007
Critical control point
Listeria monocytogenes during production of mozzarella cheese, 116
Cross protection
Cross protection to acid and osmolarity, 158
Cross-contamination
Microbial cross-contamination in kitchen, 960
Cucumbers
Salt-free cucumber storage, 885
Cultured buttermilk
Escherichia coli O157:H7 in dairy foods, 1098
Cutting board
Microbial cross-contamination in kitchen, 960
Cyclospora
Cyclospora sp. template preparation for PCR-RFLP, 1497
Cytochrome b gene
PCR identification of salmon and trout, 482
Cytochrome *b*
PCR-RFLP identification of flatfish species, 1684
Cytokine
Cytokine induction by *S. thermophilus, 859*
D values
Thermal inactivation of mycobacteria, 974
Dairy
Microbiology of Serra da Estrela cheese, 601
Dairy foods
E. coli O157:H7 in dairy products, 1602
Dairy goat
Antibiotic tests for goats, 344
Dairy industry
E. faecium adherence on stainless steel, 1454
Dairy products
Occurrence of aflatoxin M_1 in diary products in Italy, 738
Inhibition of listeria monocytogenes by D-3-phenyllactic acid, 1281

Dairy spoilage
Bacterial tracking, 1336
Damage
Recovery of irradiation-injured microorganisms, 586
Dcoxynivalenol
Affinity of activated carbons for ochratoxin A and deoxynivalenol, 469
Decision sciences pathogens
Risk assessment and economic analysis for managing risks, 1567
Decontamination
Decontamination of *L. monocytogenes* biofilms, 731
Beef decontamination by hot water, 19
Decontamination of rice, 73
Pathogen reduction by combined treatments, 823
Degradation
Histamine and tyramine degradation in cheese, 874
Metal ions in aflatoxin B_1 degradation, 1666
Dehairing
Chemical dehairing of bovine skin, 623
Deoxynivalenol
Heat and pH affect DON concentration, 365
Storage effects on barley deoxynivalenol and mold viability, 103
Depuration
Detection of NV in shellfish by RT-PCR, 1674
Listeria and *Salmonella* in mussels, 1137
Detachment
Attachment kinetics of *Listeria monocytogenes*, 1286
Detection
Comparison of *Salmonella* enrichment methods, 1504
Detection methods for *E. coli* O157:H7 in apple juice, 1425
Detection of *E. coli* O157:H7 in carcass wash water, 934
Detection of *E. coli* O157:H7 in food, 917
Detection of *Salmonella*, 792
Detoxification
Affinity of activated carbons for ochratoxin A and deoxynivalenol, 469
Diagnostic tests
Antimicrobial residues in milk and meat—a review, 742
Diazinon
Determination of diazinon and chlorpyrifos, 708
DIFT
Detection of *E. coli* O157:H7 in carcass wash water, 934
Digestion
Proficiency samples for *Trichinella* digestion assays, 1396
Direct enumeration
Enumeration of stressed *E. coli* O157:H7, 1093
dirty area
Poultry bacterial populations, 700
Disciplines
Food safety attitudes, practices, and knowledge, 1175
Discoloration
Effect of *P. fluorescens* on oxymyoglobin oxidation, 1341
Disease triangle
Dose-response modeling, 1550
Disinfectant
Decontaminating beef for *E. coli* O157:H7, 547
Microbial cross-contamination in kitchen, 960
Plasmids in *Listeria* spp., 1459
Disinfection
Chlorine dioxide bactericidal activity, 668
D value
Thermal inactivation of *E. coli* O157:H7, 285
D values
D values for *H. alvei* in smoked kahawai, 1047
D values of acid-stressed *E. coli*, 1184
DNA dot-blot
Detection of *C. perfringens* in spices, 201
DON
Heat and pH affect DON concentration, 365
Dose response mechanism
Risk assessment of *L. monocytogenes*, 244
D-3-Phenyllactic acid
Inhibition of listeria monocytogenes by D-3-phenyllactic acid, 1281
Dry cereal
B. cereus in infant cereal, 1629
Dulcitol 1-phosphate dehydrogenase
Rapid detection of *Salmonella* spp. by RAPD analysis, 785
Dye
Plasmids in *Listeria* spp., 1459
Dynamic models
Risk assessment and HACCP, 1531
E. coli
Bacterial flora of swine head meat, 249
Chlorine dioxide bactericidal activity, 668
Enumeration of *E. coli*, 360
Inactivation of *E. coli*, salmonella, and enzymes in turkey, 171
Multiplex PCR for LT I and ST II of *E. coli*, 141
Pathogen inactivation by pressure and heat, 432
Salmonellosis associated with orange juice, 280
E. coli biotype 1
E. coli isolation from carcasses, 1269
E. coli O157:H7
Antibiotic resistance to *E. coli*, 1511
Bacterial growth in vitamin E beef, 36
Decontaminating beef for *E. coli* O157:H7, 547
Detection methods for *E. coli* O157:H7 in apple juice, 1425
Detection of *E. coli* O157:H7 in food, 917
E. coli O157:H7 in apples, 1372
Inactivation and injury of *E. coli* O157:H7, 395
Inactivation of *E. coli* by vinegar, 953
Rapid detection of *E. coli* O157:H7, 812
Removal of *E. coli* O157:H7 from beef carcass surfaces, 1265
Survival of *E. coli* O157:H7 in apple cider, 490
Survival of *E. coli* O157:H7 in pepperoni, 146
Susceptibility of pathogens to acid anionic sanitizers, 1390
Economic analysis
Risk assessment and economic analysis for managing risks, 1567
Education
Food safety attitudes, practices, and knowledge, 1175
Effects of freezing and boiling
V. cholerae survival in frozen or boiled shrimp, 1317
Eggs
Detecting *salmonella enteritidis* in eggs, 107
EIA
Inspection methods for trichinellosis, 339
Eimeria
Cyclospora sp. template preparation for PCR-RFLP, 1497

EL4.IL-2
Cytokine induction by *S. thermophilus, 859*
Electron
Decontamination of rice, 73
Electron microscopy
Bacterial cell wall, 557
Elimination
Gamma irradiation and ozone treatment of *E. coli* O157:H7, 728
ELISA
Detection of *E. coli* O157:H7 in carcass wash water, 934
Determination of diazinon and chlorpyrifos, 708
E. coli O157:H7 screening using EZ coli™, 110
Heat and pH affect DON concentration, 365
MAb EM-6E11 ELISA reactivities to *Listeria* spp., 1195
Monoclonal antibodies to cooked meats, 476
Quantitative evaluation of pork adulteration, 1686
Stability of fumonisins under heating, 1030
Enhanced acid tolerance
Enhanced survival of *Escherichia coli* O157:H7, 939
Enteric viruses
PCR detection of viruses in clam extracts, 458
Enterobacteriaceae
Microbiological and chemical quality of *Turmus*, debittered lupin seeds, 1480
Enterococcus faecium
E. faecium adherence on stainless steel, 1454
Sanitizers against *E. faecium* on stainless steel, 833
Enterocolitica
Pathogenic *Y. enterocolitica* in swine, 677
Enterohemorrhagic *E. coli*
Escherichia coli O157:H7 in water, 662
Enteropathogens
Duplex quadrant plates with four selective-diagnostic media, 450
Enterotoxigenic *Bacillus cereus*
Evaluation of baby bottle disinfection procedures, 196
Enterotoxigenicity
Staphylococcus aureus strains isolated from bovine milk, 629
Enterotoxin
B. cereus in infant cereal, 1629
Clostridium perfringens enterotoxin gene prevalence, 240
Heat shock response of *C. perfringens*, 1143
Enumeration methods
Enumeration of *E. coli*, 360
Enzyme
Rapid catalase activity method, 253
Enzyme immunoassay
Evaluation of the fluorophos betascreen test, 808
Enzyme immunoassays
Enzyme immunoassay validation for drug residues in tissue, 1018
Enzymes
Inactivation of *E. coli*, salmonella, and enzymes in turkey, 171
Epidemiology
Epidemiology and food safety, 1170
Risk assessment of foodborne disease agents, 1071
Equivalence
Risk assessment and HACCP, 1531
Ergosterol
Polyclonal antibody against ergosterol hemisuccinate, 1060
Erwinia sp.
Growth of mold on apples under MA, 1661
Erysipelothrix
Occurrence of *Erysipelothrix* in chicken meat, 1207
Occurrence of *Erysipelothrix* spp. in chickens, 907
Escherichia coli
Evaluation of simplate total coliforms and *E. coli*, 444
24-H *E. coli* enumeration using SD-39 agar, 913
D values of acid-stressed *E. coli*, 1184
False-positive fluorescence from MUG, 1119
Rapid method for enumeration of *E. coli*, 1375
Sheep carcass dressing process, 329
Trailer washing for *salmonella* reduction, 31
Escherichia coli ATP
Effect of sanitizers on ATP bioluminescence, 1013
Escherichia coli O157
E. coli O157 risk factors in cattle, 802
E. coli O157:H7 in inoculated bottled water, 948
Escherichia coli O157:H7
Thermotolerance of *E. coli* O157:H7 in apple beverages, 390
ATR of *E. coli* exposed to acetic acid, 542
Beef decontamination by hot water, 19
Chemical dehairing of bovine skin, 623
Detection of *E. coli* O157:H7 in carcass wash water, 934
E. coli in cattle feces, 531
E. coli O157:H7 and meat grinders, 817
E. coli O157:H7 in dairy products, 1602
E. coli O157:H7 in frozen/thawed ground beef, 1181
E. coli O157:H7 in pepperoni, 383
E. coli O157:H7 screening using EZ coli™, 110
Enhanced survival of *Escherichia coli* O157:H7, 939
Enumeration of stressed *E. coli* O157:H7, 1093
Escherichia coli O157:H7 in dairy foods, 1098
Escherichia coli O157:H7 in water, 662
Fate of *E. coli* O157:H7 in salami, 377
Gamma irradiation and ozone treatment of *E. coli* O157:H7, 728
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
Lactobacillus lactis action against *Escherichia coli* O157:H7, 166
Pathogen reduction by combined treatments, 823
Pathogens in Lebanon bologna, 152
Performance of the petrifilm™ HEC test, 402
Purge sampling method for beef, 162
Sanitizing produce, 1305
Survival of *escherichia coli* O157:H7 in ground beef jerky, 11
Survival of pathogens in process cheese, 290
Thermal inactivation of *E. coli* O157:H7, 285
Essential oils
Aspergillus flavus control in maize with essential oils, 616
Ethanol
Inhibitory activity of soy sauce on *E. coli* O157:H7, 657
Microbial population and ethanol content of bagged salad, 358
European
Certification of microbiological methods, 1579
Ewe's
Salt balance in CO_2-treated milks, 66

Exotic meats
Vitamins in irradiated exotic meats, 1681
Expert system
Detection of toxigenic fungi in corn, 221
Exposure assessment
Exposure of population to fumonisin B_1, 879
Extracellular materials
Adhesion of *A. hydrophila* to water distribution pipes, 1321
FAO
Effect on international trade of tolerance limits, 1571
Fasting
E. coli in cattle feces, 531
Fatty acid
L. monocytogenes heat resistance and fatty acid composition, 683
FB_1
FB_1 fed to rainbow trout, 1034
Fecal contamination of carcasses
E. coli isolation from carcasses, 1269
Feces
E. coli in cattle feces, 531
Motile aeromonads from chicken, 113
Feedlot cattle
Salmonella in feedlot cattle, 525
Feeds
Aflatoxins, fumonisin B1, and zearalenone in foods, 1670
Fementation
Apiotrichum curvatum oil production in tomato juice, 1515
E. coli O157:H7 in pepperoni, 383
Fate of *E. coli* O157:H7 in salami, 377
Pathogens in Lebanon bologna, 152
Salt-free cucumber storage, 885
Fermented meat
Enumeration of stressed *E. coli* O157:H7, 1093
Survival of *E. coli* O157:H7 in pepperoni, 146
FHB
Storage effects on barley deoxynivalenol and mold viability, 103
Filled pasta
Microbiological quality of filled pasta, 994
Finfish
Microbial quality of aquacultured finfish, 205
Fingerprint
Authenticity testing of saffron aroma, 1525
Fish
Prediction of fresh fish shelf life, 844
Fish species identification
PCR identification of salmon and trout, 482
Fish spoilage
Inhibition of *P. phosphoreum*, 1191
Flamenquin
Microbial hazards in *flamenquín* processing, 693
Flatfish identification
PCR-RFLP identification of flatfish species, 1684
Flavobacterium aurantiacum
Metal ions in aflatoxin B_1 degradation, 1666
Flexible pouch
Immersion biotest to evaluate microchannel leaks in flexible pouches, 1644
Flight kitchen
Microbiology of airline food, 1052
Floor materials
Microbial load on cleaned floors, 57
Floor roughness
Microbial load on cleaned floors, 57
Flow cytometry
Rapid detection of *E. coli* O157:H7, 812
Fluorescence
False-positive fluorescence from MUG, 1119
Fluorescence detection
Evaluation of the fluorophos betascreen test, 808
Food
Capillary electrophoresis of furosine, 1400
Contamination of pté with *L. monocytogenes*, 1299
Detection of *E. coli* O157:H7 in food, 917
Plasmids in *Listeria* spp., 1459
Food hygiene
Application of lysostaphin-producing lactobacilli to food, 419
Food infections
Duplex quadrant plates with four selective-diagnostic media, 450
Food irradiation
Radiation preservation of ground beef patties, 1387
Food package
On-line package integrity testing using hydrogen, 1165
Food plant environments
Decontamination of *L. monocytogenes* biofilms, 731
Food poisoning
Clostridium perfringens enterotoxin gene prevalence, 240
Food preservation
Helicobacter pylori survival and growth, 929
Food safety
Antibiotic resistance to *E. coli*, 1511
Arcobacter in mechanically separated turkey meat, 1623
Food safety attitudes, practices, and knowledge, 1175
Pathogen reduction by combined treatments, 823
Salmonella weltevreden heat resistance in low-moisture in environments, 969
Food safety control
Epidemiology and food safety, 1170
Food simulants
Antioxidant migration from PP into food simulants, 1000
Foodborne
Recovery of irradiation-injured microorganisms, 586
Foodborne bacteria
Foodborne illness in the elderly, 1229
Foodborne disease
Cheese-associated disease outbreaks, 1405
Risk assessment of foodborne disease agents, 1071
Foodborne pathogen
Detection methods for *E. coli* O157:H7 in apple juice, 1425
Helicobacter pylori survival and growth, 929
Foodborne pathogens
Foodborne pathogens on pork and beef carcasses, 535
Pathogens in smoked fish and shellfish, 318
Susceptibility of pathogens to acid anionic sanitizers, 1390
Food-borne pathogenic bacteria
Inactivation of *E. coli* by vinegar, 953
Food-processing industry
Cheese-associated disease outbreaks, 1405
Foods
Aflatoxins, fumonisin B1, and zearalenone in foods, 1670
Free amino groups
Agglutination behavior of milk starter cultures, 855

Freeze–thaw survival
E. coli O157:H7 in frozen/thawed ground beef, 1181
Freeze-thaw
Survival of *E. coli* O157:H7 in apple cider, 490
Freezing
Biogenic amines in frozen albacore, 608
Cross-contamination during liquid nitrogen freezing, 1103
Fresh filled pasta
Clostridium botulinum and fresh filled pasta, 988
Fresh sausage
Antibiotic resistance of pathogenic isolates from sausage, 1378
Fresh-cut
Microbial population and ethanol content of bagged salad, 358
Fresh-cut vegetables
L. monocytogenes on packaged fresh-cut vegetables, 192
Fruit juices
Thermal resistance of *Neosartorya fischeri*, 1358
Frying
Formation of heterocyclic amines in cooked chicken legs, 712
FTIR
Identification of *B. cereus* by FTIR, 921
Fumonisin B1
Aflatoxins, fumonisin B1, and zearalenone in foods, 1670
Fumonisin B_1
Exposure of population to fumonisin B_1, 879
Fumonisins
Fumonisins in corn-based foods, 704
Fusarium colonization of maize, 1489
Stability of fumonisins under heating, 1030
Fungi
Interactions between cheese-related fungi, 1023
Fungus
Polyclonal antibody against ergosterol hemisuccinate, 1060
Furosine
Capillary electrophoresis of furosine, 1400
Fusarium
Comparison of assays for deoxynivalenol in milled fractions of wheat, 1695
Fusarium colonization of maize, 1489
Storage effects on barley deoxynivalenol and mold viability, 103
Gamma irradiation
Gamma irradiation and ozone treatment of *E. coli* O157:H7, 728
Gamma irradiation and ozone treatment on bee pollen, 217
Irradiation of *L. monocytogenes* on raw or cooked turkey, 979
γ-lucuronidase
24-H *E. coli* enumeration using SD-39 agar, 913
False-positive fluorescence from MUG, 1119
Gamma radiation
Vitamins in irradiated exotic meats, 1681
Gamma-glutamyltransferase
Enzyme marker for pasturization end point in milk, 1057
Gastroenteritis
Foodborne illness in the elderly, 1229
GC-AED
Determination of diazinon and chlorpyrifos, 708
Geotrichum candidum
Interactions between cheese-related fungi, 1023
Gibberella
Comparison of assays for deoxynivalenol in milled fractions of wheat, 1695
Global migration
Antioxidant migration from PP into food simulants, 1000
Goat's
Salt balance in CO_2-treated milks, 66
Grain
Fusarium colonization of maize, 1489
Greece
Milkborne pathogens in Pichtogalo cheese, 688
Green asparagus
Degradation asparagus vitamin C during thermal processing, 1518
Green mussel (*Perna viridis*)
Heavy metals in green mussels (*Perna viridis*), 94
Ground beef
Bacterial growth in vitamin E beef, 36
Microbial profile of ground beef, 1109
Microbial profile of ground beef, 1615
Quantitative evaluation of pork adulteration, 1686
Radiation preservation of ground beef patties, 1387
Thermal inactivation of *E. coli* O157:H7, 285
Ground beef jerky
Survival of *escherichia coli* O157:H7 in ground beef jerky, 11
Growth
Growth of *Salmonella* isolates, 964
Predictive models in quantitative risk assessments, 1541
Survival and growth of *Campylobacter jejuni* on chicken skin, 1609
Growth conditions
E. faecium adherence on stainless steel, 1454
Growth studies
L. monocytogenes on packaged fresh-cut vegetables, 192
Gulf of Thailand
Heavy metals in green mussels (*Perna viridis*), 94
HACCP
Beef decontamination by hot water, 19
Chemical dehairing of bovine skin, 623
Epidemiology and food safety, 1170
Fate of microorganisms in liquid sweeteners, 295
Foodborne pathogens on pork and beef carcasses, 535
HACCP principles, 1246
HACCP Principles, 762
Microbial risk assessment, 1075
Pathogen reduction by combined treatments, 823
Risk assessment and HACCP, 1531
Sheep carcass dressing process, 329
Hafnia alvei
D values for *H. alvei* in smoked kahawai, 1047
Halva
Microbial stability and *Salmonella* survival in halva, 181
Hamburger
Rapid catalase activity method, 253
Hazard analysis
HACCP principles, 1246
HACCP Principles, 762
Headspace
Microbial population and ethanol content of bagged salad, 358

Heat
E. coli O157:H7 in pepperoni, 383
L. monocytogenes heat resistance and fatty acid composition, 683
Pathogen inactivation by pressure and heat, 432
Heat inactivation
Enzyme marker for pasturization end point in milk, 1057
Virulence factors of *L. monocytogenes*, 899
Heat resistance
Heat resistance of *A. acidoterrestris* spores, 41
Salmonella weltevreden heat resistance in low-moisture in environments, 969
Thermal inactivation of mycobacteria, 974
Heat shock
Heat shock response of *C. perfringens*, 1143
Heat treatment
Quantitative microbiological risk assessment, 1446
Heavy metals
Heavy metals in green mussels (*Perna viridis*), 94
Helicobacter pylori
Helicobacter pylori survival and growth, 929
Hemicelluloses
Degradation of hemicellulosic polysaccharides, 87
Hens
Salmonella penetration through fresh eggshell, 350
Hepatitis A virus
PCR detection of viruses in clam extracts, 458
Heterocyclic amines
Formation of heterocyclic amines in cooked chicken legs, 712
High hydrostatic pressure
High hydrostatic pressure come-up time, 1657
High-pressure resistance of *listeria* in liquid egg, 119
Oscillatory HHP, 1213
High pressure
Changes in pressurized milk, 735
Shelf life, safety, and quality of pressure-treated pork, 1649
High-pressure liquid chromatography
Enzyme immunoassay validation for drug residues in tissue, 1018
H_2S release
Detection of H_2S in salmonellae, 620
Histamine
Histamine and histamine-producers in smoked fish, 1064
Histamine and tyramine degradation in cheese, 874
Histamine-producing bacteria
Histamine and histamine-producers in smoked fish, 1064
Holding temperature
Growth of *Salmonella* isolates, 964
Hot meal
Microbiology of airline food, 1052
Hot water
Microbial profile of ground beef, 1109
Microbial profile of ground beef, 1615
Postprocess beef carcass contamination, 300
HPLC
Biogenic amines in frozen albacore, 608
Fumonisins in corn-based foods, 704
Stability of fumonisins under heating, 1030
HPLC analysis
Formation of heterocyclic amines in cooked chicken legs, 712
Human
Plasmids in *Listeria* spp., 1459
Human health
Risk assessment and economic analysis for managing risks, 1567
Hunter color
Organic acids effect on *L. monocytogenes* on catfish, 1470
Hydrodynamic pressurization
Hydrodynamic pressurization and trichinellosis, 637
Hydrogen
On-line package integrity testing using hydrogen, 1165
Hydrogen peroxide
Salt-free cucumber storage, 885
Hydrostatic pressure
Inactivation of foodborne bacteria by pressure and pediocin AcH, 425
Hygiene monitoring
Comparison of ATP hygiene-monitoring systems, 499
Ice cream
S. enteritidis in ice cream, 5
Identification
Identification of *B. cereus* by FTIR, 921
Ikura
Microbial evaluation of Alaska salmon caviar, 626
IL-2
Cytokine induction by *S. thermophilus, 859*
IL-5
Cytokine induction by *S. thermophilus, 859*
IL-6
Cytokine induction by *S. thermophilus, 859*
Immersion biotest
Immersion biotest to evaluate microchannel leaks in flexible pouches, 1644
Immunity
Foodborne illness in the elderly, 1229
Immunoassay
Comparison of assays for deoxynivalenol in milled fractions of wheat, 1695
MAb EM-6E11 ELISA reactivities to *Listeria* spp., 1195
Immunomagnetic separation
Evaluation of dynabeads anti-*Salmonella*, 1507
Rapid detection of *E. coli* O157:H7, 812
Impedance measurement
Sanitizers against *E. faecium* on stainless steel, 833
Inactivation
Predictive models in quantitative risk assessments, 1541
Incidence
Occurrence of *Listeria* supp. in Brazilian cheese, 354
Incurred tissue samples
Enzyme immunoassay validation for drug residues in tissue, 1018
Indicator media
Evaluation of dynabeads anti-*Salmonella*, 1507
Indicator organisms
Beef decontamination by hot water, 19
Infant feeding bottles
Evaluation of baby bottle disinfection procedures, 196
Infectious dose
Quantitative microbiological risk assessment, 1446
Infective dose
S. enteritidis in ice cream, 5
Infectivity
Comparison of *Salmonella* enrichment methods, 1504

Inhibitory action
Inhibition of listeria monocytogenes by D-3-phenyllactic acid, 1281
Injured cells
Enumeration of stressed *E. coli* O157:H7, 1093
Inorganic content
Indicators of origins of spanish salts, 891
Insecticides
Determination of diazinon and chlorpyrifos, 708
Inside–outside birdwasher
Antimicrobial spray of chicken carcasses, 829
Insulin-dependent diabetes mellitus
Selective hydrolysis of milk proteins, 1007
Interaction
Interactions between cheese-related fungi, 1023
Interaction of bacteriocius
Interactions between bacteriocins, 1210
Interactions
Fusarium colonization of maize, 1489
Interleukin
Cytokine induction by *S. thermophilus, 859*
International trade
Effect on international trade of tolerance limits, 1571
Intestinal mucus
S. typhimurium attachment to mucus, 265
Irradiation
Effect of electron beam irradiation on plasticizer migration, 720
Recovery of irradiation-injured microorganisms, 586
ISO-GRID®
24-H *E. coli* enumeration using SD-39 agar, 913
Isolate
Growth of *Salmonella* isolates, 964
Isolation
Occurrence of *Erysipelothrix* in chicken meat, 1207
Occurrence of *Erysipelothrix* spp. in chickens, 907
Juice
Microwave inactivation of microorganisms, 582
Kahawai
D values for *H. alvei* in smoked kahawai, 1047
Kinetics
Degradation asparagus vitamin C during thermal processing, 1518
L. monocytogenes
Bacterial growth in vitamin E beef, 36
MAb EM-6E11 ELISA reactivities to *Listeria* spp., 1195
Washing to reduce bacteria on salmon, 848
LAB
Interactions between bacteriocins, 1210
λ-actam antibiotics
Evaluation of the fluorophos betascreen test, 808
λ-actamasc activity
Antibiotic susceptibility of *Lactobacillus* species, 1636
λ-actamase
Extracellular λ-actamases from *Streptococcus thermophilus,* 896
Lactate dehydrogenase
Enzyme marker for pasturization end point in milk, 1057
Lactic acid
Inactivation and injury of *E. coli* O157:H7, 395
Microbial profile of ground beef, 1109
Microbial profile of ground beef, 1615
Postprocess beef carcass contamination, 300
Use of bioluminescent *Salmonella* to monitor survival and viability, 1439
Lactic acid bacteria
Alteration of bacterial ability to remove aflatoxin, 466
Bacterial cell wall, 557
Cytokine induction by *S. thermophilus, 859*
Microbiological and chemical quality of *Turmus*, debittered lupin seeds, 1480
Lactic and acetic acid
Inhibitory activity of soy sauce on *E. coli* O157:H7, 657
Lactobacilli
Antibiotic susceptibility of *Lactobacillus* species, 1636
Lactobacillus acidophilus
Reduction of *Salmonella* colonization, 176
Lactobacillus alimentarius
Lactobacillus alimentarius inhibition of *Listeria* in ground beef, 551
Lactobacillus lactis
Lactobacillus lactis action against *Escherichia coli* O157:H7, 166
Lactobacillus plantarum
Bacteriocin-mediated inhibition of *L. monocytogenes*, 186
Lactobacillus reuteri
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
Lactobacillus
S. typhimurium attachment to mucus, 265
Lactoperoxidase system
O157 VTEC in raw cow's milk, 1597
Leakage
On-line package integrity testing using hydrogen, 1165
Lebanon bologna
Pathogens in Lebanon bologna, 152
Lectin
Bacterial cell wall, 557
Lettuce
Microbiology of packaged produce, 1148
Sanitizing produce, 1305
Liquid nitrogen
Cross-contamination during liquid nitrogen freezing, 1103
Liquid smoke
Behavior of *Listeria* spp. in smoked fish, 1475
Liquid sweeteners
Fate of microorganisms in liquid sweeteners, 295
Listeria monocytogenes
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
Bacteriocin-mediated inhibition of *L. monocytogenes*, 186
Contamination of pté with *L. monocytogenes*, 1299
Decontamination of *L. monocytogenes* biofilms, 731
Inactivation of *L. monocytogenes* by PEF, 1203
Inhbitory effects of plant extracts on pathogens, 307
Inhibition of listeria monocytogenes by D-3-phenyllactic acid, 1281
Irradiation of *L. monocytogenes* on raw or cooked turkey, 979
L. monocytogenes from unpasteurized apple juice, 1199
L. monocytogenes heat resistance and fatty acid composition, 683
L. monocytogenes on packaged fresh-cut vegetables, 192
Lactobacillus alimentarius inhibition of *Listeria* in ground beef, 551

Listeria monocytogenes during production of mozzarella cheese, 116
Occurrence of *Listeria* supp. in Brazilian cheese, 354
Organic acids effect on *L. monocytogenes* on catfish, 1470
Risk assessment of *L. monocytogenes*, 244
Sanitizing produce, 1305
Survival of pathogens in process cheese, 290
Virulence factors of *L. monocytogenes*, 899
Listeria
Attachment kinetics of *Listeria monocytogenes*, 1286
Attachment of *Listeria monocytogenes*, 1293
Behavior of *Listeria* spp. in smoked fish, 1475
Growth of pathogens at 4°C on fillets of aquacultured fish, 313
High-pressure resistance of *listeria* in liquid egg, 119
MAb EM-6E11 ELISA reactivities to *Listeria* spp., 1195
Pathogens in smoked fish and shellfish, 318
Plasmids in *Listeria* spp., 1459
Shelf life, safety, and quality of pressure-treated pork, 1649
Susceptibility of pathogens to acid anionic sanitizers, 1390
Listeria sp.
Listeria and *Salmonella* in mussels, 1137
Listeria spp.
Listeria spp. in microwave-cooked chicken, 1465
Listeria spp. antibiotic resistance
Antibiotic resistance of pathogenic isolates from sausage, 1378
Listeriolysin O
Virulence factors of *L. monocytogenes*, 899
Listeriosis
Contamination of pté with *L. monocytogenes*, 1299
Liver
Campylobacter spp. in porcine liver, 409
Low moisture
Salmonella weltevreden heat resistance in low-moisture environments, 969
Low-moisture confection
Microbial stability and *Salmonella* survival in halva, 181
LT I
Multiplex PCR for LT I and ST II of *E. coli*, 141
Lupin
Microbiological and chemical quality of *Turmus*, debittered lupin seeds, 1480
Lupin alkaloids
Microbiological and chemical quality of *Turmus*, debittered lupin seeds, 1480
Lupin seeds debittering
Microbiological and chemical quality of *Turmus*, debittered lupin seeds, 1480
Lyophilization
Effect of lyophilization on stability of a TTI, 633
Lysine bioavailability
Maillard reaction in milk-based foods, 235
Lysostaphin
Application of lysostaphin-producing lactobacilli to food, 419
Lysozyme
Antimicrobial packaging films, 1330
Antimicrobial properties of lysozyme transgenic milk, 52
Bacterial killing by combined treatments, 839
Maillard reaction
Maillard reaction in milk-based foods, 235
Maize
Aspergillus flavus control in maize with essential oils, 616
Corn proteins and resistance to *aspergillus flavus*, 98
Manganese
Cobalt and managanese in beers, 129
Mango juice
Use of heat and spices in preservation of mango juice, 725
Manure
Removal of *E. coli* O157:H7 from beef carcass surfaces, 1265
Marker bacteria
Duplex quadrant plates with four selective-diagnostic media, 450
Mastitis
PCR for staphylococcal toxins, 1384
Maximum likelihood
Estimating numbers of organisms, 1535
m-ColiBlue24
Coliforms in bottled water, 334
Measurement and sampling error
Estimating numbers of organisms, 1535
Meat
Antimicrobial residues in milk and meat—a review, 742
Cross-contamination during liquid nitrogen freezing, 1103
Meat contamination
Removal of *E. coli* O157:H7 from beef carcass surfaces, 1265
Meat grinder
E. coli O157:H7 and meat grinders, 817
Meat juices
Purge sampling method for beef, 162
Meat preservation
Radiation preservation of ground beef patties, 1387
Meat safety
Steam pasteurization of beef carcasses, 571
Survival of *E. coli* O157:H7 in pepperoni, 146
Meat starter organism
Application of lysostaphin-producing lactobacilli to food, 419
Media
Campylobacter spp. in porcine liver, 409
Mesophile
Arrhenius and *z*-value models, 910
Mesophilic starter cultures
Agglutination behavior of milk starter cultures, 855
Mesophilic starters
Milkborne pathogens in Pichtogalo cheese, 688
Metabolites
Interactions between cheese-related fungi, 1023
Method of moments
Estimating numbers of organisms, 1535
Methodology
E. coli O157:H7 in inoculated bottled water, 948
Effect on international trade of tolerance limits, 1571
Microaerobic
Helicobacter pylori survival and growth, 929
Microbial
Quantitative risk assessment in microbial food safety, 640
Quantitative risk assessment in microbial food safety, 640
Food safety

Quantitative risk assessment in microbial food safety, 640
Monte Carlo
Quantitative risk assessment in microbial food safety, 640
Quantitative risk assessment
Quantitative risk assessment in microbial food safety, 640
Simulation
Microbial and physicochemical properties
Gamma irradiation and ozone treatment on bee pollen, 217
Microbial challenge tests
Behavior of *Listeria* spp. in smoked fish, 1475
Microbial distribution
Quantitative microbiological risk assessment, 1446
Microbial flora
Microbiological and chemical quality of *Turmus*, debittered *lupin seeds, 1480*
Microbial food safety
Risk assessment framework, 1216
Microbial hazard
Microbial hazards in flamenqui[illegible]cessing, 693
Microbial inactivation
Oscillatory HHP, 1213
Microbial load
Microbial load on cleaned floors, 57
Microbial quality
Microbial populations of fruit exposed to volatile compounds, 1352
Microbial quality of aquacultured finfish, 205
Organic acids effect on L. *monocytogenes* on catfish, *1470*
Microbial reduction
Antimicrobial spray of chicken carcasses, 829
Microbial stability
Use of heat and spices in preservation of mango juice, 725
Microbiological
Microbiological quality of meat in Australia, 437
Microbiological limits
Remarks on three-class sampling plans, 757
Microbiological methods
Certification of microbiological methods, 1579
Microbiological quality
Microbiological quality of filled pasta, 994
Microbiological quality control
Remarks on three-class sampling plans, 757
Microbiology
Arcobacter in mechanically separated turkey meat, 1623
Biogenic amines in frozen albacore, 608
Microbial evaluation of Alaska salmon caviar, 626
Quality of commercial soymilk, 1161
Shelf life of prepeeled potato, 591
Shelf life of sliced raw potatoes, 1363
Shelf life, safety, and quality of pressure-treated pork, 1649
Microchannel leak
Immersion biotest to evaluate microchannel leaks in flexible pouches, 1644
Micrococcus freudenreichii
Effect of growth medium on thermal inactivation, 578
Microflora
Microbiology of Serra da Estrela cheese, 601
Micro-ID *Listeria*
L. monocytogenes from unpasteurized apple juice, 1199
Microorganisms
Chilling and trimming reduce microorganisms, 487
Microbial population and ethanol content of bagged salad, 358
Recovery of irradiation-injured microorganisms, 586
Microwave cooking
Formation of heterocyclic amines in cooked chicken legs, 712
Microwave ovens
Listeria spp. in microwave-cooked chicken, 1465
Migration
Effect of electron beam irradiation on plasticizer migration, 720
Military food
Duplex quadrant plates with four selective-diagnostic media, *450*
Milk
Staphylococcus aureus strains isolated from bovine milk, 629
Albendazole residues in milk and cheese, 1484
Antimicrobial properties of lysozyme transgenic milk, 52
Antimicrobial residues in milk and meat—a review, 742
Changes in pressurized milk, 735
Inactivation of *L. monocytogenes* by PEF, 1203
Occurrence of aflatoxin M_1 in diary products in Italy, 738
Thermal inactivation of mycobacteria, 974
Milk allergy
Anaphylaxis from milk-contaminated sorbet, 1522
Milk contamination
Anaphylaxis from milk-contaminated sorbet, 1522
Milk fat
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
Milk pasteurization
Enzyme marker for pasturization end point in milk, 1057
Milk products
Capillary electrophoresis of furosine, 1400
Milk proteins allergy
Western blotting of milk proteins in soymilk, 1691
Milk-based foods
Maillard reaction in milk-based foods, 235
Milkborne pathogens
Milkborne pathogens in Pichtogalo cheese, 688
Mineral balance
Salt balance in CO_2-treated milks, 66
Modeling
High hydrostatic pressure come-up time, 1657
Models
Quantitative microbiological risk assessment, 1446
Modified atmosphere
Microbial population and ethanol content of bagged salad, 358
Modified atmosphere packaging
C. Botulinum on sliced potatoes with and without sulfitte in a modified atmosphere, 126
Inhibition of *P. phosphoreum*, 1191
Thawed and fresh cod fillets stored under modified atmosphere, 1129
Toxin production by *Clostridium botulinum* in map vegetables, 324
Mold
Polyclonal antibody against ergosterol hemisuccinate, 1060

Monitoring
Duplex quadrant plates with four selective-diagnostic media, 450
Monoclonal antibody
MAb EM-6E11 ELISA reactivities to *Listeria* spp., 1195
Monoclonal antibodies to cooked meats, 476
Monte Carlo simulation
Simulation modeling, 1560
Risk assessment framework, 1216
Most probable number (MPN)
Estimating numbers of organisms, 1535
Motile aeromonads
Chicken
Motile aeromonads from chicken, 113
Motile aeromonads from chicken, 113
Mozzarella cheese
Listeria monocytogenes during production of mozzarella cheese, 116
Multiplex PCR
Multiplex PCR for LT I and ST II of *E. coli*, 141
Mussels
Listeria and *Salmonella* in mussels, 1137
Mycobacterium paratuberculosis
Thermal inactivation of mycobacteria, 974
Mycotoxin
Comparison of assays for deoxynivalenol in milled fractions of wheat, 1695
Alteration of bacterial ability to remove aflatoxin, 466
Mycotoxins
Fusarium colonization of maize, 1489
National Advisory Committee on Microbiological Criteria for Foods
HACCP principles, 1246
HACCP Principles, 762
Neosartorya fischeri
Thermal resistance of *Neosartorya fischeri*, 1358
Neural network
Detection of toxigenic fungi in corn, 221
Nisin
Antimicrobial packaging films, 1330
Bacterial killing by combined treatments, 839
Psychrotrophic Bacillus cereus, 563
Nondestructive leak test
On-line package integrity testing using hydrogen, 1165
Nonsulfite dipping
Shelf life of prepeeled potato, 591
Nontoxic safe sanitizers
Susceptibility of pathogens to acid anionic sanitizers, 1390
Norwalk virus
Detection of NV in shellfish by RT-PCR, 1674
PCR detection of viruses in clam extracts, 458
NPLC
Salt-free cucumber storage, 885
Numerical clustering probiotic
Bifidobacterium characterization, 865
Nursing homes
Foodborne illness in the elderly, 1229
Occurrence
Occurrence of *Erysipelothrix* in chicken meat, 1207
Occurrence of *Erysipelothrix* spp. in chickens, 907
Ochratoxin A
Affinity of activated carbons for ochratoxin A and deoxynivalenol, 469
Offal
Campylobacter spp. in porcine liver, 409
Olive
Degradation of hemicellulosic polysaccharides, 87
Degradation of pectic polysaccharides, 78
Olive oil
Effect of electron beam irradiation on plasticizer migration, 720
Oncorhynchus mykiss
PCR identification of salmon and trout, 482
Orange
Citrus surface microflora reduced in packinghouse, 903
Orange juice
Salmonellosis associated with orange juice, 280
Organic acid
Heat resistance of *A. acidoterrestris* spores, 41
Organic acids effect on *L. monocytogenes* on catfish, 1470
Organic acids
Enhanced survival of *Escherichia coli* O157:H7, 939
Organic acid spray wash of catfish, 495
Thermal resistance of Neosartorya fischeri, 1358
Organophosphates
Determination of diazinon and chlorpyrifos, 708
Oxymyoglobin oxidation
Effect of P. fluorescens on oxymyoglobin oxidation, 1341
Oyster preservation
Antibacterial effect of N-sulfonated and N-sulfobenzoyl chitosan, 1124
Ozone treatment
Gamma irradiation and ozone treatment of *E. coli* O157:H7, 728
Gamma irradiation and ozone treatment on bee pollen, 217
P. fluorescens
Effect of *P. fluorescens* on oxymyoglobin oxidation, 1341
Packaging film
Microbiology of packaged produce, 1148
Partial oxygen pressure
Effect of *P. fluorescens* on oxymyoglobin oxidation, 1341
Pasteurization
Thermal inactivation of mycobacteria, 974
Vitamins in irradiated exotic meats, 1681
Pasteurization value
Microbiological quality of filled pasta, 994
Pâté
Contamination of pté with L. monocytogenes, 1299
Pathogen
Fate of E. coli O157:H7 in salami, 377
Sanitizing produce, 1305
Pathogen reduction
Steam pasteurization of beef carcasses, 571
Pathogenic
Pathogenic *Y. enterocolitica* in swine, 677
Pathogenic bacteria
Inactivation of foodborne bacteria by pressure and pediocin AcH, 425
Pathogenicity
Dose-response modeling, 1550

Pathogens
Effect on international trade of tolerance limits, 1571
Fate of microorganisms in liquid sweeteners, 295
PCR
Arcobacter in mechanically separated turkey meat, 1623
Clostridium perfringens enterotoxin gene prevalence, 240
Detection of *E. coli* O157:H7 in carcass wash water, 934
Detection of *Salmonella*, 792
Detection of *Salmonella* spp. within 24 hours, 1039
L. monocytogenes from unpasteurized apple juice, 1199
PCR detection of viruses in clam extracts, 458
PCR identification of salmon and trout, 482
PCR template
Cyclospora sp. template preparation for PCR-RFLP, 1497
PCR-based assay
Molecular assay for bovine mtDNA detection in feedstuffs, 513
PCR-RFLP
PCR-RFLP identification of flatfish species, 1684
Pectic polysaccharides
Degradation of pectic polysaccharides, 78
Pediococcus
Effect of growth medium on thermal inactivation, 578
Microwave inactivation of microorganisms, 582
PEF
Inactivation of *L. monocytogenes* by PEF, 1203
Penetration
Salmonella penetration through fresh eggshell, 350
Penicillin resistance
Extracellular λ-actamases from *Streptococcus thermophilus*, 896
Pepperoni
E. coli O157:H7 in pepperoni, 383
Survival of *E. coli* O157:H7 in pepperoni, 146
Peptidoglycan
Bacterial cell wall, 557
Petrifilm™
Evaluation of SimPlate™ total plate count, 14
PFGE
Clostridium perfringens enterotoxin gene prevalence, 240
pH
Heat and pH affect DON concentration, 365
Heat resistance of *A. acidoterrestris* spores, 41
Inhibitory activity of soy sauce on *E. coli* O157:H7, 657
L. monocytogenes from unpasteurized apple juice, 1199
L. monocytogenes heat resistance and fatty acid composition, 683
Pathogens in Lebanon bologna, 152
Phospholipase C
Virulence factors of *L. monocytogenes*, 899
Photoacoustic FTIR spectra
Detection of toxigenic fungi in corn, 221
Photobacterium phosphoreum
Inhibition of *P. phosphoreum*, 1191
Thawed and fresh cod fillets stored under modified atmosphere, 1129
Photon-counting TV camera
Rapid detection of vaiable bacteria, 1312
Pichtogalo Chanion cheese
Milkborne pathogens in Pichtogalo cheese, 688
Pickling
Degradation of hemicellulosic polysaccharides, 87
Degradation of pectic polysaccharides, 78
Pigs
Hydrodynamic pressurization and trichinellosis, 637
Pizza
E. coli O157:H7 in pepperoni, 383
Plant extracts
Inhbitory effects of plant extracts on pathogens, 307
Plasmid
Plasmids in *Listeria* spp., 1459
Plasticizers
Effect of electron beam irradiation on plasticizer migration, 720
Polyclonal antibody
Polyclonal antibody against ergosterol hemisuccinate, 1060
Polymerase chain reaction
Confirmation of *Salmonella* by PCR, 1381
PCR for staphylococcal toxins, 1384
Polypropylene
Antioxidant migration from PP into food simulants, 1000
Pork
Campylobacter spp. in porcine liver, 409
Chilling and trimming reduce microorganisms, 487
Inspection methods for trichinellosis, 339
Quantitative evaluation of pork adulteration, 1686
Shelf life, safety, and quality of pressure-treated pork, 1649
Potatoes
C. Botulinum on sliced potatoes with and without sulfitte in a modified atmosphere, 126
Poultry
Automated ribotyping of *Salmonella*, 519
Detection of *Salmonella*, 792
Detection of *Salmonella* spp. within 24 hours, 1039
Microbial cross-contamination in kitchen, 960
Poultry bacterial populations, 700
Use of bioluminescent *Salmonella* to monitor survival and viability, 1439
Pre-chill spraying
Chemical spraying of chicken skin, 272
Prediction equation
Pathogens in Lebanon bologna, 152
Prediction of toxin
Prediction of time to *C. botulinum* toxin for use with TTI, 1154
Predictive microbial modeling
Simulation modeling, 1560
Predictive microbiology
Microbial risk assessment, 1075
Predictive models in quantitative risk assessments, 1541
Preenrichment
Comparison of *Salmonella* enrichment methods, 1504
Prepared meal
Microbial hazards in *flamenquín* processing, 693
Prepeeled potato
Shelf life of prepeeled potato, 591
Preservation
Use of heat and spices in preservation of mango juice, 725
Preservative
Inhibitory activity of soy sauce on *E. coli* O157:H7, 657
Preservatives
Thermal resistance of *Neosartorya fischeri*, 1358

Pressure
Pathogen inactivation by pressure and heat, 432
Pressurization temperature
Inactivation of foodborne bacteria by pressure and pediocin AcH, 425
Pressurization time
Inactivation of foodborne bacteria by pressure and pediocin AcH, 425
Prevalence
Salmonella in feedlot cattle, 525
Probability
Dose-response modeling, 1550
Probability distributions
Estimating numbers of organisms, 1535
Probiotic
Cytokine induction by *S. thermophilus, 859*
Reduction of *Salmonella* colonization, 176
Process cheese
Survival of pathogens in process cheese, 290
Processing
Washing to reduce bacteria on salmon, 848
Processing plant
Occurrence of *Erysipelothrix* in chicken meat, 1207
Proficiency
Proficiency samples for *Trichinella* digestion assays, 1396
Propionibacterium
Bacterial cell wall, 557
Propionibacteria in acid and low pH, 211
Propionic acid
Propionibacteria in acid and low pH, 211
Protection
Aspergillus flavus control in maize with essential oils, 616
Protective culture
Application of lysostaphin-producing lactobacilli to food, 419
Protein value
Maillard reaction in milk-based foods, 235
Proteolysis
Agglutination behavior of milk starter cultures, 855
Changes in pressurized milk, 735
Pseudomonas fluorescens
Prediction of fresh fish shelf life, 844
Pseudomonas putida
Rapid assessment of sanitizer efficacy against biofilms, 1043
Pseudomonas sp.
Coliforms in bottled water, 334
Pseudomonas
Bacterial tracking, 1336
Psychrotroph
Bacterial tracking, 1336
Psychrotrophic
Psychrotrophic *Bacillus cereus*, 563
Psychrotrophic lactic acid bacteria
E. faecium adherence on stainless steel, 1454
Public health
Exposure of population to fumonisin B_1, 879
Risk assessment and HACCP, 1531
Purge
Purge sampling method for beef, 162
PVC
Chlorine dioxide bactericidal activity, 668
Effect of electron beam irradiation on plasticizer migration, 720
PVDC/PVC
Effect of electron beam irradiation on plasticizer migration, 720
Quadrant plates
Duplex quadrant plates with four selective-diagnostic media, 450
Quality
Microbiology of Serra da Estrela cheese, 601
On-line package integrity testing using hydrogen, 1165
Quality of commercial soymilk, 1161
Quality assurance
Proficiency samples for *Trichinella* digestion assays, 1396
Quantitative microbial risk assessment
Simulation modeling, 1560
Quantitative microbiological risk assessment
Quantitative microbiological risk assessment, 1446
Quantitative risk assessment
Predictive models in quantitative risk assessments, 1541
Radial immunodiffusion
Quantitative evaluation of pork adulteration, 1686
Rainbow trout
Growth of pathogens at 4°C on fillets of aquacultured fish, 313
RAPD
Rapid detection of *Salmonella* spp. by RAPD analysis, 785
Rapid detection
Detection of H_2S in salmonellae, 620
E. coli O157:H7 screening using EZ coli™, 110
Rapid detection of *E. coli* O157:H7, 812
Rapid detection of *Salmonella* spp. by RAPD analysis, 785
Rapid method
Evaluation of SimPlate™ total plate count, 14
Rapid method for enumeration of *E. coli*, 1375
Rapid methods
24-H *E. coli* enumeration using SD-39 agar, 913
Certification of microbiological methods, 1579
Raspberry
Cyclospora sp. template preparation for PCR-RFLP, 1497
Raw
Irradiation of *L. monocytogenes* on raw or cooked turkey, 979
RAW 264.7
Cytokine induction by *S. thermophilus, 859*
Raw chickens
Listeria spp. in microwave-cooked chicken, 1465
Raw milk
Evaluation of the fluorophos betascreen test, 808
O157 VTEC in raw cow's milk, 1597
Reconstitution
B. cereus in infant cereal, 1629
Recovery
E. coli O157:H7 in inoculated bottled water, 948
Recovery of irradiation-injured microorganisms, 586
Recovery medium
Thermal inactivation of *E. coli* O157:H7, 285
Redigel™
Evaluation of SimPlate™ total plate count, 14
Reduced fat
E. coli O157:H7 in pepperoni, 383
Reduction
Gamma irradiation and ozone treatment of *E. coli* O157:H7, 728

Refrigerated ground beef
Lactobacillus alimentarius inhibition of *Listeria* in ground beef, 551
Refrigerated storage
Changes in pressurized milk, 735
Relative humidity
Salmonella weltevreden heat resistance in low-moisture in environments, 969
Renneting properties
Salt balance in CO_2-treated milks, 66
Residues
Albendazole residues in milk and cheese, 1484
Resistance
Plasmids in *Listeria* spp., 1459
Resistant mechanism
Corn proteins and resistance to *aspergillus flavus*, 98
Response surface modeling
Growth of mold on apples under MA, 1661
Retail survey
Histamine and histamine-producers in smoked fish, 1064
Reuterin
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
RFLP analysis
Cyclospora sp. template preparation for PCR-RFLP, 1497
Rhamnose
L. monocytogenes from unpasteurized apple juice, 1199
Ribotyping
Automated ribotyping of *Salmonella*, 519
Bacterial tracking, 1336
Rice
Decontamination of rice, 73
Risk
Clostridium botulinum and fresh filled pasta, 988
Risk analysis
Effect on international trade of tolerance limits, 1571
Microbial risk assessment, 1075
Risk assessment
Risk assessment and economic analysis for managing risks, 1567
Risk assessment and HACCP, 1531
Risk assessment framework, 1216
Risk assessment of foodborne disease agents, 1071
Risk factors
E. coli O157 risk factors in cattle, 802
Risk management
Risk assessment and economic analysis for managing risks, 1567
Roasting
Stability of fumonisins under heating, 1030
Roe
Microbial evaluation of Alaska salmon caviar, 626
RT-PCR
Detection of NV in shellfish by RT-PCR, 1674
S. aureus
Pathogen inactivation by pressure and heat, 432
Saccharomyces cerevisiae
High hydrostatic pressure come-up time, 1657
Saffron
Authenticity testing of saffron aroma, 1525
Safranal
Authenticity testing of saffron aroma, 1525
Salad
Microbial population and ethanol content of bagged salad, 358
Salami
Fate of *E. coli* O157:H7 in salami, 377
Salmo salar
PCR identification of salmon and trout, 482
Salmon
False-positive fluorescence from MUG, 1119
Microbial evaluation of Alaska salmon caviar, 626
Washing to reduce bacteria on salmon, 848
Salmonella
Pathogens in smoked fish and shellfish, 318
Quantitative microbiological risk assessment, 1446
S. enteritidis in ice cream, 5
Salmonella enteritidis
Bacterial penetration after egg washing, 276
Detecting *salmonella enteritidis* in eggs, 107
Microbial stability and *Salmonella* survival in halva, 181
Salmonella penetration through fresh eggshell, 350
Salmonella typhimurium
Beef decontamination by hot water, 19
Chemical dehairing of bovine skin, 623
Chemical spraying of chicken skin, 272
Dosage titration of a characterized competitive exclusion culture, 796
Pathogen reduction by combined treatments, 823
Pathogens in Lebanon bologna, 152
Reduction of *Salmonella* colonization, 176
Salmonella penetration through fresh eggshell, 350
Salmonellae
Detection of H_2S in salmonellae, 620
Salmonella
Automated ribotyping of *Salmonella*, 519
Bacterial flora of swine head meat, 249
Comparison of *Salmonella* enrichment methods, 1504
Confirmation of *Salmonella* by PCR, 1381
Detection of *Salmonella*, 792
Detection of *Salmonella* spp. within 24 hours, 1039
Growth of *Salmonella* isolates, 964
Inactivation of *E. coli*, salmonella, and enzymes in turkey, 171
Rapid detection of *Salmonella* spp. by RAPD analysis, 785
S. typhimurium attachment to mucus, 265
Salmonella in feedlot cattle, 525
Salmonellosis associated with orange juice, 280
Sanitizing produce, 1305
Shelf life, safety, and quality of pressure-treated pork, 1649
Survival of pathogens in process cheese, 290
Susceptibility of pathogens to acid anionic sanitizers, 1390
Trailer washing for *salmonella* reduction, 31
Use of bioluminescent *Salmonella* to monitor survival and viability, 1439
Salmonella detection
Evaluation of dynabeads anti-*Salmonella*, 1507
Salmonella sp.
Listeria and *Salmonella* in mussels, 1137
Salmonella spp.
Antibiotic resistance of pathogenic isolates from sausage, 1378

Salt
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
Sample types
Poultry bacterial populations, 700
Sampling
Purge sampling method for beef, 162
Sampling plans
Remarks on three-class sampling plans, 757
Sanitizer
Sanitizing produce, 1305
Sanitizer activity
Sanitizers against *E. faecium* on stainless steel, 833
Sanitizers
E. coli O157:H7 and meat grinders, 817
Rapid assessment of sanitizer efficacy against biofilms, 1043
Sausage
Rapid catalase activity method, 253
Scombroid poisoning
D values for *H. alvei* in smoked kahawai, 1047
Seafood products
Arsenic speciation in manufactured seafood products, 1240
Selective enrichment
Comparison of *Salmonella* enrichment methods, 1504
Selective hydrolysis
Selective hydrolysis of milk proteins, 1007
Selective plating media
Survival of *escherichia coli* O157:H7 in ground beef jerky, 11
Sensory
Shelf life of prepeeled potato, 591
Shelf life of sliced raw potatoes, 1363
Serology
Inspection methods for trichinellosis, 339
Sheep
Sheep carcass dressing process, 329
Shelf life
Bacterial tracking, 1336
Microbial populations of fruit exposed to volatile compounds, 1352
Shelf life, safety, and quality of pressure-treated pork, 1649
Washing to reduce bacteria on salmon, 848
Shell eggs
Salmonella penetration through fresh eggshell, 350
Shellfish
Detection of NV in shellfish by RT-PCR, 1674
Shrimp
V. cholerae survival in frozen or boiled shrimp, 1317
SimPlate™
Evaluation of simplate total coliforms and *E. coli*, 444
Evaluation of SimPlate™ total plate count, 14
Single cell oil
Apiotrichum curvatum oil production in tomato juice, 1515
Slaughterhouses
Foodborne pathogens on pork and beef carcasses, 535
S-layer
Bacterial cell wall, 557
Sliced potato
Shelf life of sliced raw potatoes, 1363
Smoked fish
Behavior of *Listeria* spp. in smoked fish, 1475
Histamine and histamine-producers in smoked fish, 1064
Pathogens in smoked fish and shellfish, 318
Smoked seafood
Pathogens in smoked fish and shellfish, 318
Smoked shellfish
Pathogens in smoked fish and shellfish, 318
Sodium chloride
Cross protection to acid and osmolarity, 158
Inhibitory activity of soy sauce on *E. coli* O157:H7, 657
Sodium lactate
Cross protection to acid and osmolarity, 158
Solubility
Solubility and color of dried soymilk, 231
Sour cream
Escherichia coli O157:H7 in dairy foods, 1098
Soy
Quality of commercial soymilk, 1161
Soy proteins
Western blotting of milk proteins in soymilk, 1691
Soymilk
Quality of commercial soymilk, 1161
Solubility and color of dried soymilk, 231
Western blotting of milk proteins in soymilk, 1691
Spanish edible salts
Indicators of origins of spanish salts, 891
Speciation
Arsenic speciation in manufactured seafood products, 1240
Specific migration
Antioxidant migration from PP into food simulants, 1000
Specific spoilage organisms
Inhibition of *P. phosphoreum*, 1191
Sphinganine
FB_1 fed to rainbow trout, 1034
Sphingosine
FB_1 fed to rainbow trout, 1034
Spice contamination
Detection of *C. perfringens* in spices, 201
Spice plants
Antifungal activity of herbs and spices, 123
Spices
Use of heat and spices in preservation of mango juice, 725
Spoilage bacteria
Inactivation of foodborne bacteria by pressure and pediocin AcH, 425
Spoilage domain
Inhibition of *P. phosphoreum*, 1191
Spoilage prediction
Prediction of fresh fish shelf life, 844
Spores
B. cereus in infant cereal, 1629
Heat resistance of *A. acidoterrestris* spores, 41
Sporulation
Heat shock response of *C. perfringens*, 1143
spray drying
Solubility and color of dried soymilk, 231
Spray washing
Organic acid spray wash of catfish, 495
ST II
Multiplex PCR for LT I and ST II of *E. coli*, 141

Standards
Effect on international trade of tolerance limits, 1571
Staphylococcal food poisoning
Application of lysostaphin-producing lactobacilli to food, 419
Staphylococci
False-positive fluorescence from MUG, 1119
Staphylococcus
Staphylococcus aureus strains isolated from bovine milk, 629
Staphylococcus aureus
Microbiological quality of filled pasta, 994
PCR for staphylococcal toxins, 1384
Plasmids in *Listeria* spp., 1459
Survival of pathogens in process cheese, 290
Starter cultures
E. coli O157:H7 in dairy products, 1602
Statutory regulations
Indicators of origins of spanish salts, 891
Steam pasteurization
Steam pasteurization of beef carcasses, 571
Steel
Chlorine dioxide bactericidal activity, 668
Storability
Solubility and color of dried soymilk, 231
Storage
Salt-free cucumber storage, 885
Storage effects on barley deoxynivalenol and mold viability, 103
Storage temperature
Fate of *E. coli* O157:H7 in salami, 377
Strawberry
Microbial populations of fruit exposed to volatile compounds, 1352
Streptococcus fascium
Reduction of *Salmonella* colonization, 176
Streptococcus thermophilus
Extracellular λ-actamases from *Streptococcus thermophilus*, 896
Stress
Attachment kinetics of *Listeria monocytogenes*, 1286
Attachment of *Listeria monocytogenes*, 1293
Stress proteins
Heat shock response of *C. perfringens*, 1143
Sublethal injury
Inactivation and injury of *E. coli* O157:H7, 395
Sugar fermentation
Bifidobacterium characterization, 865
Sulfate
Salt-free cucumber storage, 885
Sulfites
C. Botulinum on sliced potatoes with and without sulfitte in a modified atmosphere, 126
Sulfobenzoyl chitosan
Antibacterial effect of *N*-sulfonated and *N*-sulfobenzoyl chitosan, 1124
Sulfonated chitosan
Antibacterial effect of *N*-sulfonated and *N*-sulfobenzoyl chitosan, 1124
Sulfur dioxide
Salt-free cucumber storage, 885
Sulphite substitution
Shelf life of sliced raw potatoes, 1363
Superantigens
PCR for staphylococcal toxins, 1384
Superoxide dismutase
Virulence factors of *L. monocytogenes*, 899
Surface free energy
Microbial load on cleaned floors, 57
Surfaces
Adhesion of *A. hydrophila* to water distribution pipes, 1321
Survival of *C. jejuni* associated with wood, 26
Surrogate
Dose-response modeling, 1550
Surveillance
Risk assessment of foodborne disease agents, 1071
Survey
Microbiological quality of meat in Australia, 437
Survival
E. coli O157:H7 in inoculated bottled water, 948
Listeria and *Salmonella* in mussels, 1137
Listeria spp. in microwave-cooked chicken, 1465
Survival and growth of *Campylobacter jejuni* on chicken skin, 1609
Survival of *aeromonas hydrophila* in tomatoes, 414
Survival of *C. jejuni* associated with wood, 26
Survival of *E. coli* O157:H7 in apple cider, 490
Swine
Pathogenic *Y. enterocolitica* in swine, 677
Swine head meat
Bacterial flora of swine head meat, 249
Synthetic gastric fluid
Enhanced survival of *Escherichia coli* O157:H7, 939
TD-GC-MS
Authenticity testing of saffron aroma, 1525
Teichoic acid
Bacterial cell wall, 557
Temperature
Listeria spp. in microwave-cooked chicken, 1465
Pathogens in Lebanon bologna, 152
Survival of *aeromonas hydrophila* in tomatoes, 414
Use of bioluminescent *Salmonella* to monitor survival and viability, 1439
Temperatures
Adhesion of *A. hydrophila* to water distribution pipes, 1321
Test kit
Antibiotic tests for goats, 344
Thawed cod fillets
Thawed and fresh cod fillets stored under modified atmosphere, 1129
Thermal death
D values for *H. alvei* in smoked kahawai, 1047
Thermal inactivation
Effect of growth medium on thermal inactivation, 578
Thermal inactivation of mycobacteria, 974
Thermal inactivation kinetics
Arrhenius and *z*-value models, 910
Thermal processing
Degradation asparagus vitamin C during thermal processing, 1518
Thermal resistance
Thermal resistance of *Neosartorya fischeri*, 1358
Thermotolerance
Thermotolerance of *E. coli* O157:H7 in apple beverages, 390

Time
Pathogens in Lebanon bologna, 152
Time temperature indicators
Inactivation of *E. coli,* salmonella, and enzymes in turkey, 171
Times to toxin
Prediction of time to *C. botulinum* toxin for use with TTI, 1154
Time-temperature indicators
Prediction of time to *C. botulinum* toxin for use with TTI, 1154
Time-temperature integrator
Effect of lyophilization on stability of a TTI, 633
TNF-α
Cytokine induction by *S. thermophilus, 859*
Tolerance limits
Effect on international trade of tolerance limits, 1571
Tomato
Sanitizing produce, 1305
Tomato juice
Apiotrichum curvatum oil production in tomato juice, 1515
Tomatoes
Survival of *aeromonas hydrophila* in tomatoes, 414
Toxicity
Arsenic speciation in manufactured seafood products, 1240
C. Botulinum on sliced potatoes with and without sulfitte in a modified atmosphere, 126
Toxigenic fungi
Detection of toxigenic fungi in corn, 221
Toxins
Effect on international trade of tolerance limits, 1571
PCR for staphylococcal toxins, 1384
Trace metal ions
Metal ions in aflatoxin B_1 degradation, 1666
Transgenic
Antimicrobial properties of lysozyme transgenic milk, 52
Trichinella spiralis
Inspection methods for trichinellosis, 339
Trichinella
Proficiency samples for *Trichinella* digestion assays, 1396
Trichinellosis
Hydrodynamic pressurization and trichinellosis, 637
Trimming
Chilling and trimming reduce microorganisms, 487
Trisodium phosphate
Bacterial killing by combined treatments, 839
TSP
Microbial profile of ground beef, 1109
Microbial profile of ground beef, 1615
Postprocess beef carcass contamination, 300
Turkey
Arcobacter in mechanically separated turkey meat, 1623
Inactivation of *E. coli,* salmonella, and enzymes in turkey, 171
Irradiation of *L. monocytogenes* on raw or cooked turkey, 979
Turmus
Microbiological and chemical quality of *Turmus*, debittered lupin seeds, 1480
Tyramine
Histamine and tyramine degradation in cheese, 874
UHT milk
Inhibition of *L. monocytogenes* and *E. coli* O157:H7 by reuterin, 1275
Uncertainty
Dose-response modeling, 1550
Unpasteurized apple juice
L. monocytogenes from unpasteurized apple juice, 1199
Urea
Helicobacter pylori survival and growth, 929
Vacuum packaged
Lactobacillus alimentarius inhibition of *Listeria* in ground beef, 551
Validation
Certification of microbiological methods, 1579
HACCP principles, 1246
HACCP Principles, 762
Variability
Dose-response modeling, 1550
Vegetables
Microbial cross-contamination in kitchen, 960
Toxin production by *Clostridium botulinum* in map vegetables, 324
Vegetative cells
B. cereus in infant cereal, 1629
Verification
HACCP principles, 1246
HACCP Principles, 762
Verification of beef carcass cooling, 1347
Verocytoxtoxin-producing *Escherichia coli* O157
O157 VTEC in raw cow's milk, 1597
Viable but nonculturable state
Escherichia coli O157:H7 in water, 662
Viable counts
Rapid detection of vaiable bacteria, 1312
Vibrio cholerae 01
V. cholerae survival in frozen or boiled shrimp, 1317
Vinegar
Inactivation of *E. coli* by vinegar, 953
Virulence
Risk assessment of *L. monocytogenes*, 244
Vitamin C
Shelf life of prepeeled potato, 591
Vitamin E
Bacterial growth in vitamin E beef, 36
Volatile compounds
Microbial populations of fruit exposed to volatile compounds, 1352
Vomitoxin
Comparison of assays for deoxynivalenol in milled fractions of wheat, 1695
Heat and pH affect DON concentration, 365
Washing
Citrus surface microflora reduced in packinghouse, 903
Washing to reduce bacteria on salmon, 848
Water
Escherichia coli O157:H7 in water, 662
Escherichia coli O157:H7 in water, 662
Water activity
Salmonella weltevreden heat resistance in low-moisture in environments, 969
Waxing
Citrus surface microflora reduced in packinghouse, 903
Western blotting
Western blotting of milk proteins in soymilk, 1691

Whey proteins
Selective hydrolysis of milk proteins, 1007
Whole egg
High-pressure resistance of *listeria* in liquid egg, 119
Whole-cell proteins
Bifidobacterium characterization, 865
WTO
Effect on international trade of tolerance limits, 1571
Yeast
Apiotrichum curvatum oil production in tomato juice, 1515
Yersinia
Pathogenic *Y. enterocolitica* in swine, 677
Yogurt
Escherichia coli O157:H7 in dairy foods, 1098
Zea mays
Corn proteins and resistance to *aspergillus flavus*, 98
Zearalenone
Aflatoxins, fumonisin B1, and zearalenone in foods, 1670
z value
Thermal inactivation of *E. coli* O157:H7, 285
z-Value model
Arrhenius and *z*-value models, 910
Zone of inhibition
Antimicrobial packaging films, 1330
Zygosaccharomyces bailii
High hydrostatic pressure come-up time, 1657
Oscillatory HHP, 1213
